+91-6395646026 | **rishabhbhatt956@gmail.com** | **Linkedin-Link** | **Github-Link**

Targeting Frontend Developer roles to apply my expertise in **JavaScript, React.js, Tailwind CSS** and **REST APIs** focusing on **responsive, modern UIs** with frameworks like **ShadCN** and **AeternityUI,** while continuing to grow and contribute to impactful projects.

Education

Mahrishi Kanva Niketan Kanvaghati	**March 2020 – May 2021**
10th & 12th	
Uttaranchal University	**Aug 2021 – May 2024**
Bachelor of Science in Information Technology	Dehradun, Uttarakhand

Technical Skills & Frameworks

- Data Structures & Algo.
- Frontend Dev.
- MongoDB.
- Android Studio.
- React.js.
- Next.js.
- JavaScript.
- Java.

Projects (Major & Mini)

Personal Portfolio (Link: Portfolio Link)   **Jun 2024 – July 2024**

Designed and developed a comprehensive **Portfolio** showcasing my web development skills. The website serves as a dynamic platform to highlight my expertise in frontend development, **UI/UX design** and **coding practices**.

- Built with **Next.js** and **React.js** for seamless user interactions and **server-side rendering**.
- Utilized **AeternityUI** for a futuristic interface and **TypeScript** for type safety.
- Hosted on **Netlify** ensuring fast and reliable performance.

Gold's Gym Website: (Link: Active Link)   **April 2024 – May 2024**

Developed a modern and user-friendly website for "**Gold's Gym**" offering visitors free access to **workout lessons**, including integrated **YouTube** video tutorials.

- Created a modern website offering free workout lessons with **YouTube** video integration.
- Implemented with JavaScript for interactive elements and **TailwindCSS** for clean, responsive design.
- Includes **categorized** workout lessons and **responsive** design for all devices.

Aadhar Dashboard: (Link: Active Link)   **April 2024 – May 2024**

Developed an admin dashboard named "**Aadhar Dashboard**" designed to streamline user registration and manage updates on uploaded credentials.

- Developed an admin dashboard for user registration and credential management with visit tracking.
- Built using **React.js** for dynamic UI and **TailwindCSS** for a clean, responsive interface.
- The dashboard also tracks the last time each user visited.

NewsMonk (Mini Project: Active Link)   **Nov 2023 – Dec 2023**

Developed a news website that provides users with the latest top headlines across various categories, including **Sports, Science, Tech** and **Politics**. The site aggregates news from **newsapi.org** and presents it in an organized, user-friendly format.

- Created a news website displaying top headlines in **Sports, Science, Tech** and **Politics**.
- Developed using React.js for dynamic content rendering and Bootstrap 5 for responsive design.

Academic Achievements & Coding Profiles:

- Implemented a **Facial attendance tracker system** for college to track and **export** attendance of students in **CSV format.**
- **Won 2nd prize** in college **Web Development Competition** for promoting the **"Local to Vocal"** initiative
- **Leetcode**: 130 Questions Solved: **Profile Link**
- **Coding Ninjas: Profile Link**
- **GitHub: GitHub Profile**
